

September - December 2020

Form/ Year Group / Section Events	Personal, Social, Health, Citizenship Education (PSHCE)	Computing
* ALL EVENTS & TRIPS ARE SUBJECT TO CHANGE OR CANCELLATION DEPENDING ON THE WIDER SITUATION. Informal Parents' Evening: Tuesday 15 <sup>th</sup> September.	Managing Time- Pupils will be assessing their management of time. Discussion will help them understand the importance of planning and organisation in their personal lives. They will explore work habits and discuss problems with homework and how best to handle these	For the first half of the year pupils will work on a Dragon's Den type project. They will work collaboratively in groups to form their own business.
Abingdon Prep School Open Morning: Saturday 10th October.	problems.	Presentation skills
Half-term begins: Friday 16 <sup>th</sup> October (4.10pm) Half-term ends: Sunday 1st November Year 7 Scholarship Information Evening: Tuesday 3rd November.	Right and Wrong- Pupils will explore their values and discuss anti-social behaviour. Diversity-Pupils will be exploring attitudes to diversity and look into stereotyping.	This term they will decide on the nature of their 'business' and will be asked to present their ideas at the end of half term. They will choose the way they communicate their ideas by practising and extending the ICT skills learnt last year, e.g. Powerpoint, Google slides, videos.
JPA Fireworks Evening: Friday 6th November. Year 7 Parents' Evening: Tuesday 10th November.	Well-Being- Pupils will learn self-organisation strategies as well as relaxation techniques and consider how to achieve a balanced life.	Creating a logo and slogan using Photoshop or similar
Whole school Christmas Bazaar: Saturday 5th December. Whole School Christmas Carol Service: Tuesday 8 <sup>th</sup> December. Term ends: Friday 11 <sup>th</sup> December (12.00pm).	They will also be developing skills to build resilience and emotional health.	Using their ICT skills, they will need to create a logo and slogan for their business.
		Creating a cost model for their business using Excel
		The pupils will use a spreadsheet to model costs and potential profit for their business.
English	Mathematics	Science
This term the pupils will study the following topics:. <b>Reading:</b> Pupils will learn to understand, analyse and evaluate meaning from a range of poetry and prose. Pupils will learn skills including: understanding and vocabulary; use of text to illustrate answers; drawing of inferences; evaluation of style, language and purpose; delivery of arguments based on material; awareness of how grammar, syntax and punctuation affect meaning and capacity to make comparisons and evaluate contrast. They will start to look at a well published novelist and analyse the language used within this well known and respected text. <b>Writing:</b> Pupils will study how to write for a practical purpose: to argue, persuade, explain, advise, and inform. They will also be given tasks which provoke imaginative, descriptive or narrative responses. In addition, there will be an opportunity to write about texts which pupils have studied in class or read for themselves. Pupils will continue to extend their knowledge of spelling, grammar and punctuation through regular exercises in class and feedback from written assignments. <b>Studied literature:</b> The main literary focus this term is 'Goodnight, Mr Tom' by Michelle Magorian. Pupils will investigate the themes of the novel and its historical context. They will look at the writing style used by Magorian, particularly her use of structure and dialogue. Pupils will	The pupils will study the following topics: (topics are extended for Set 1 and further reinforcement is given in Set 2) <b>Number:</b> Addition and subtraction of large numbers and decimals using standard written methods and mental strategies. Multiplying by 1 and 2 digit numbers and multiplying decimals by decimals. Dividing by a single digit with decimal and fraction remainders. Dividing by 2 digit numbers using factors and long division. Add, subtract, multiply and divide negative numbers. <b>Properties of number</b> : Rules of divisibility. Write numbers as the product of primes and find HCF and LCM. Set 1 find squares and roots using the product of primes. <b>Speed/Distance/Time.</b> Both mentally and with calculators. <b>Fractions:</b> Finding fractional amounts. Ordering fractions. Adding, subtracting mixed fractions. Multiply and divide simple fractions. <b>Algebra:</b> Basic rules of algebra. Simplifying simple expressions and basic substitution. <b>Shape and Space:</b> Drawing and measuring different types of angles. Angle chasing. <b>Data Handling:</b> Interpreting and drawing frequency diagrams and pie charts. Averages. <b>Measurement:</b> Area and perimeter of compound shapes. Area of	<ul> <li>Biology The pupils will start by studying the human body, including the topics of food and digestion, breathing and circulation, movement and keeping fit and healthy. They will be carrying out a number of investigations about the body system and have the opportunity to see some pigs' lungs. This will be followed by a short topic on microbes. Time permitting we may then move on to some chemistry.</li></ul>

I then write staries incrimed by the nevel based on friendship. Following		
then write stories, inspired by the novel, based on friendship. Following		
this, they will study aspects of 'A Christmas Carol' by Charles Dickens.		
Geography	History	Religious Education (RE)
This term the pupils will investigate the principal elements of <b>weather</b> <b>and climate</b> – temperature, rainfall, air pressure, wind, sunshine. The unit begins with a consideration of how the weather affects our everyday lives. This has led to the development of the science of meteorology. Measuring the weather with traditional mechanical weather stations are introduced, as well as more modern approaches with satellites and remote data logging weather stations. Pupils will discover how weather data is recorded and presented using the synoptic code. The principles of how elements of weather form are introduced including: why it rains, types of rainfall; air masses and types of weather systems that bring our weather – depressions and anticyclones. Pupils will conduct a geographical enquiry collecting weather data to identify the type of weather system passing over their home area. This investigation requires pupils to apply their understanding of what they learn in their classwork to a managed use of fieldwork and their enquiry skills. Pupils are introduced to the concept of climate, and the climate of the UK, investigated using climate graphs, and climate maps to analyse data for places in the UK. Finally, pupils discover world climate zones and learn about the factors that affect climate – latitude, distance from the sea, altitude and prevailing winds.	This term the pupils will be studying how to study History. They will be looking at what History is and how it can be defined. They will then move on to look at a range of techniques and key words associated with historical evaluation of materials. This will include ideas such as chronology, bias, sources and origin. Towards the end of the term the pupils will use all of their new skills to evaluate a set of given sources and answer the question ' Does Bigfoot Exist?'.	This term, pupils in year 7 will be studying the <b>Old Testament.</b> They will explore narratives such as the Creation Accounts, The Fall and the story of Cain and Abel. The pupils will also evaluate the role of the biblical material in relation to contemporary issues, both ethical and theological.
The pupils will also continue to develop their locational knowledge		
and <b>map skills</b> . There will be a focused assessment in map skills and		
on weather and climate at the right points of time during this unit.	Lotin	Core Skills

Students will create their own character and must work as a team to overcome the challenges in The Lost Valley. Pupils will develop collaboration and mime skills as well as learning about character creation.
<b>Games</b> Due to the Covid-19 pandemic, <b>Cricket</b> will be played during the 1st half of term. In this unit pupils will demonstrate consistency, timing and fluency in the execution of core skills for batting, bowling and fielding. Pupils will work on improving the skill of outwitting opponents as a batter and bowler. Development of decision making skills will be encouraged through game play. Pupils should independently be able to score and officiate cricket games. All pupils will participate in inter-house matches. During the 2nd half of term the major team sport will be <b>Rugby</b> . The pupils will develop their skills in the 12-a-side format through a combination of skills sessions and matches. They will learn safe and effective tackling techniques and scrummage in 5-man scrums. They will be taught how to ruck, maul, and place the ball appropriately in these situations. They will learn how to improve their support play, including their running with or without the ball. They will develop their positional play and respond to phases of play through 1 <sup>st</sup> , 2 <sup>nd</sup> , and 3 <sup>rd</sup> phases. They will practise kicking. They will be taught how to avoid infringements, start or restart the game, avoid becoming offside, and improve their knowledge of the principles of rugby and their tactical awareness. They will improve their decision making, in both attack and defence, and learn how to better us space. All pupils will participate in inter-house 7-a-side matches (Inter-school 12-a-side matches will be played subject to government advice). At all times pupils will follow the RFU Continuum.	<ul> <li>Physical Education (PE) &amp; Swimming</li> <li>During the first half of term the pupils will focus on developing</li> <li>badminton skills. In particular they will be taught and have the chance to practise the short and long serve, as well as the overhead clear.</li> <li>Later in the term the volley pass, the smash and the set shot will all be covered in volleyball lessons.</li> <li>The Year 7 pupils will learn and practise the following skills:</li> <li>Water survival: Towing. Non-contact &amp; contact. Rescue techniques. Life-saving.</li> <li>Front Crawl: Including in developing their arms, breathing, and turns. There will be an assessment.</li> <li>Water polo: They will learn and practise skills to allow them to participate in games.</li> </ul>	Extended Project (EP) & Study Skills This term Year 7 pupils will be the first cohort to take this new subject. Over the course of the term the pupils will follow a programme of study in which they will learn to consider, research and reflect on how best to produce an independent study project. During the first half term they will explore different realistic and achievable topics or ideas that could be used for the project. They will learn the importance of organisation and time-keeping needed to carry out their project. They will learn to do a literature search, and how to collect, analyse and present their data. In the second half of term they will begin their research and use the time to improve and reflect on how to use the data gathered.
