

Itinerary for Margam Field Centre Activities

Friday 26 June: Arrive lunchtime. Survey sampling with quadrats on the grasslands in the Country Park.

Evening: Set up pit fall traps in woodlands on the country park.

Saturday 27 June: Freshwater Invertebrate study focusing on adaptations, pollution indicators and populations.

Late afternoon/evening – collect in pitfall traps to see what was found and identify invertebrates.

Sunday 28 June: Day on the rocky shore – look at zonation and also looking for fossils – most likely at Llantwit Major. Depart late afternoon.
