To all boys studying a language for IGCSE and beyond and parents

Languages Support Clinics: Dates and Times

As a department, we run a wide range of clinics targeting various year groups and / or skills. Subject teachers and heads of language will have already communicated with the boys most in need of extra support and we would strongly encourage those boys to prioritise these clinics in which they will receive tailored help. Combined with regular, focused work in class and for prep, this should help them achieve their potential.
