

# Colet Mentoring Programme

---

Dear Parents,

Colet Mentoring is a virtual maths mentoring programme run in joint collaboration between St Paul's, London-based EdTech EasyA, Abingdon School, Larkmead, John Mason and Fitzharrys.

The programme provides students with on-demand homework help from mentors at our partner schools: students simply snap a photo of their question to get help from a mentor right away, all via their smartphone. Here's a short video from some of the mentors on [how it works](#).

**This pilot programme will initially be open to students in Year 10. In order to enroll your child, please complete this [form](#). Colet Mentoring will then send you access details so your child can ask any questions they have via the app.**

We hope that our students will benefit from this virtual mentoring initiative, by giving them access to extra support when they're doing work outside school.

Please find attached further information/visuals showing how the programme works. If you have any questions, please let us know.
