

ABINGDON CHEMISTRY

Summer Term Periodic Table Competition (for Lower School and Middle School students)

Fill up our Periodic Table!

Every element has a space in the Chemistry Department's Periodic Table display but as yet only some elements have items to show.

This competition gives you a chance to have your own creation on display in the cabinet.

How to enter

Step 1 Pick an element (your choice – even those that already have something in them if you can think of something better).

Step 2 Create or find something to display about that element for our Periodic Table.*

You have a box-shaped space measuring 15 cm x 15 cm x 15 cm for each element. Anything larger won't fit!

Step 3 Hand in your entry to your Chemistry teacher **before half term of summer term.**

Winners

There will be book token prizes for the best entries (1st, 2nd, 3rd prizes) and the best entry for every element will go into the display.

**Whatever you create has to be safe. It shouldn't be radioactive, toxic, spontaneously catch fire or explode. Entries will be judged by members of the chemistry department.*
